

SURGE PROTECTIVE MODULES IN LOW-VOLTAGE POWER SUPPLY NETWORKS.

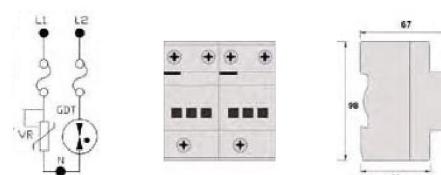

Type 1+2 surge protective devices are installed in the main electrical panel of the installation.

They are recommended to protect electric and electronic devices against surges of atmospheric and manoeuvres origin by coordinating Type 1 and Type 1+2 features.

- Protection Class I+II in accordance with EN 61643-11.
- Protection Type 2 in accordance with IEC 61643-1.
- Easy supervision due to the disconnection device.
- Four-pole surge protective devices consisting of a base part and a plugin protective module.
- Fault indication by red flag window.
- Rapid response.
- Optional remote alarm terminal.
